Logistics Metric Analysis Report System

type of fill table

- Provides the criteria for a transaction to be considered in the correct LRT Report

C4.6.3.1.1.2.

Examination of the data in the transaction against the values in Columns “A” through “H” of the LMARS Fill Table yields one of the Fill Types below (which equate to Column “I”) of the LMARS Fill Table. The derived Fill Type is inserted into the LMARS database date element “CORP-FILL-TYPE” for that transaction document number.

The screenshot displays the 'DEFENSE LOGISTICS AGENCY Transaction Services' website. The header includes the agency logo and the title 'Logistics Metrics Analysis Reporting System / Logistics Response Time (LMARS / LRT)'. A navigation menu on the left lists various options, with 'Type of Fill' highlighted. The main content area, titled 'Type of Fill', contains a link to the 'LMARS Fill Type Table' and a reference to DLM 4000.25, Volume 6, Chapter 4, C4.6.3.1.1. Below this, a section titled 'C4.6.5.3. Fill Type Sub-Sections' explains that each Major Report Category Section is further sub-divided into six Fill Type Sub-Sections, each with a total line recording document numbers based on satisfaction criteria. An arrow points from the 'Type of Fill' menu item to the 'LMARS Fill Type Table' link.
